$h = 467.33$

v = ?

$$h = \frac{9(v-273.15)}{5} + 32$$

$$467.33 = \frac{9(v-273.15)}{5} + 32$$

$$467.33 - 32 = \frac{9(v-273.15)}{5}$$

$$435.33 = \frac{9(v-273.15)}{5}$$

$$435.33(5) = 9(v - 273.15)$$

$$2176.65 = 9(v - 273.15)$$

$$2176.65 = 9(v - 273.15)$$

$$\frac{2176.65}{9} = v - 273.15$$

$$241.85 = v - 273.15$$

$$241.85 + 273.15 = v$$

$$515 = v$$
