

First day: $270
Each additional day: $135
Rental period: x days
Total cost: y
Equation for y?

Total cost = First–day cost + Additional–day cost

$$y = 270 + 135(x - 1)$$
$$y = 270 + 135x - 135$$
$$y = 135x + 135$$
